

Instructor: Your Methods section, about how you had this 50/50 divide between Medical and Non Medical.

Student: Yeah, that's the only thing that I'm thinking and I could--then, if, after this, since doing this, I think I'll just replicate that exact same thing over and over again down through these--all these other ones. And pretty much just do it the exact same way. Because I was almost at, like, I was saying I was at a standstill pretty much about what I should do with my numbers.

Instructor: Mm-hm.

Student: At that point I'm like, okay this is, like, a huge chunk of what my Methods is. And if I don't---Well, not my Methods. My Findings. If I don't have this chunk in my Findings and if this is completely wrong way I'm going, I'm at a standstill. I can't finish my Discussion. I need this Findings for my Discussion to talk about what I found in terms of my Literature Review. And my biggest thing is I'm gonna just, like, get this done today. Take a break tomorrow. Finish it all up. Put it all together on Sunday. Because is that what you...
