

Instructor: So the other thing I would say with this little Findings section, and I actually have another meeting at 12:30 but I think that hopefully what we've done here you're gonna replicate this with the other, right? But the other thing I would do--exactly, yeah, if you'll stay where you are right now, if you'll scroll up to that image.

Student: This one?

Instructor: Yeah, I think--I really like this I can tell that you've pulled this off of Google Forms. I'm kind of thinking it might be useful to create a second visual that sort of visualizes what you're saying in the paragraph after that because you're showing us almost like, like one of those clustered bar charts where you can show us that, like, 6 participants said yes and only 4 said no.

Student: Yeah, well, um, this is what's weird. When I go into Google Forms... I will go into... if this will pull up, maybe. I'm actually going to--new share. I'm gonna just share my screen with you.

Instructor: Okay.

Student: And I'll show you what I mean, because this is interesting, actually.
